# Ein stiller Killer

*Zu hohen Blutdruck merkt man lange Zeit nicht, doch über die Jahre nimmt das Herz-Kreislauf-System Schaden. Fast eine Milliarde Menschen leidet daran, Tendenz steigend. Dabei lässt sich die Krankheit eigentlich ganz gut in Griff bekommen. . . .*

*. . . . Schon heute leidet jeder zweite Europäer zwischen 35 und 64 daran. . . .*

Suchbegriff: <<hypertension>>

Acebutolol	Alfuzosin	Alprenolol
Alseroxylon	Amantadine	Amiloride
Amlodipine	Atenolol	Benazepril
Bendroflumethiazide	Benzthiazide	Betanidine
Betaxolol	Bimatoprost	Bisoprolol
Bosentan	Bretylum	Brimonidine
Brinzolamide	Candesartan	Candoxatril
Captopril	Carboprost Tromethamine	Carteolol
Carvedilol	Chlorothiazide	Chlorthalidone
Clonidine	<b>Cocaine</b>	Cryptenamine
Cyclothiazide	Deserpidine	Dexamethasone
Diltiazem	Dorzolamide	Doxazosin
<b>Doxycycline</b>	Eletriptan	<b>Enalapril</b>
Enalkiren	<b>Epoprostenol</b>	Eprosartan
Ergoloid mesylate	Felodipine	Fenoldopam

**Cocain**

RN 50-36-2  
EINECS 200-032-7
